HYDRANT FLUSHING

The Public Works Department will be flushing hydrants in **JUNE!** The time of flushing will be between the hours of 7a.m. and 4:00p.m. Monday through Friday. The flushing of the hydrants opens the hydrants and cleans out the chemical and mineral deposits in the water mains and insures that each hydrant is functioning properly for fire protection purposes. If water is drawn into the house or business plumbing during, or soon after hydrants in the area have been opened, it may include dislodged materials and look discolored. It is not harmful but could cause laundry stains. If such discolored water is drawn into the property, it can be cleared by opening the water taps nearest the water meter to full flow until the water runs clear. If you have any special situations that might be affected by water main flushing or questions, please contact the Public Works Department 715-447-8520.
